

1. What you can do with the jQuery?

We can make lot of things with jQuery :

- HTTP Request
- Find element in html file with a special property
- Change css
- Create Event
- Make animation
- Work with object

2. How it can help you as web developer?

I don't know. Just we read minus code when we use jQuery that javascript for make the same things. I'm not web developer and I'm not good for this.

3. If you think our earlier participant list app, in what kind of issues you could use jQuery?

We can display our person list with jQuery.

4. What are CDNs? What kind of benefits you get if you use them?

CDN "Content Delivery Network" are computer on internet where there are data that the user can use. Example of CDN for streaming of media like web radio or live.
